Minnesota Academic Excellence Foundation (MAEF) school spotlight Award Winners for 2009 announced

ROSEVILLE – Ten schools received the *2009 Minnesota Academic Excellence Foundation School Spotlight Award* for academic excellence and student success as evidenced by their students' achievements.

"It is a privilege to recognize schools that are making great strides toward closing the achievement gap in Minnesota," said Melissa Malen, Minnesota Academic Excellence Foundation chair. "Spotlight Award-winning schools have used data-driven and student-centered approaches to develop unique curriculum, student support programs and staff development opportunities that in combination have brought their students success. The impact of the achievements made by their students will last a lifetime."

MAEF awarded the following schools the *2009 MAEF School Spotlight Award* in recognition of academic excellence and to celebrate the success evidenced by their students' achievements. The award shines a spotlight on a school's curriculum, instruction, assessment and staff development that addresses student needs and works toward success for all. All Minnesota schools that participate in Minnesota's statewide assessments are eligible to apply.
