## CHAPTER 10 – PERMITTED CODE COMBINATIONS

---

---

### Introduction

The main objective of UFARS is to uniformly collect district financial data from all reporting units. The purpose of this chapter is to provide guidance as to the permitted combinations of dimension codes to ensure compliance with state, federal and other external reporting requirements.

Expenditure codes are divided into two basic categories, unrestricted and restricted. Unrestricted codes are used to record expenditures of a Local Educational Agency (LEA) that spends nonspendable, committed, assigned or unassigned revenues of the district. Restricted codes are used to record expenditures of an LEA that spends restricted/reserved revenues. These expenditure accounts utilize a finance code other than 000.

As an assurance that all expenditures are reported in compliance with these formats, each approved financial system must include edit programs that prevent an LEA from reporting data in accounts that do not contain approved combinations of dimension codes. The Department of Education also performs the same edits to double check each account before the data is entered into the state's database. If, for any reason, data is reported that does not comply with the state's edit program, the entire submission is rejected. An LEA must then make the appropriate corrections and resubmit its data.

Revenue accounts have the same classification as expenditures. Unrestricted revenues are recorded to the nonspendable, committed, assigned or unassigned fund balance accounts; restricted revenues are recorded to the appropriate restricted/reserved fund balance accounts. Again, restricted/reserved revenues can be identified through the use of a finance code other than 000. However, there currently are no grids contained in this manual to aid in revenue coding, nor are there edit programs to ensure the compliance of revenue account code combinations. Using the combination of the Finance and Source chapters of this manual, along with the payment information indicated either on the warrant of the Integrated Department of Education Aids System (IDEAS) report; an LEA will be able to determine the permitted revenue code combinations.

The following pages of this chapter contain tables to aid in the selection of proper code combinations for expenditures.

## Unrestricted Expenditure Grid

### Unrestricted Expenditures – Permitted Coding Grids

Unrestricted expenditure account codes must conform to the reporting standards outlined in this section. The unrestricted grids contain the allowable combinations, by fund, organization, program and object.

To use these grids, a determination must first be made regarding the appropriate fund and program. Once these two determinations are made and located on the grids, the allowable organization(s) and object(s) can be located on the horizontal axis of the grids.

A complete and correct determination for unrestricted expenditure codes can be made following those steps.

**Example:** Salary for the superintendent

	<b>Dimension</b>	<b>Account Code</b>	
Determine	Fund:	01	General
Determine	Program:	020	Office of the Superintendent

## Restricted Finance Grid

### Restricted Expenditures – Detailed Accounting and Reporting Requirements

School district expenditures that require a finance code because they are funded by federal grants, state statute or rule, or entitlements must be classified in accordance with the UFARS Chapter 10 Restricted Finance Grid that is described below.

The first section of the grid, Restricted Operating Capital Expenditure, is used for capital expenditures that use facilities, equipment, or disabled accessibility revenues. The second section, Restricted Finance Grid, is used for all other restricted expenditures.

Grid Layout

<b>FIN</b>	<b>DESCRIPTION</b>	<b>FUNDS</b>	<b>ORGANIZATION</b>	<b>PROGRAMS</b>	<b>OBJECT</b>
------------	--------------------	--------------	---------------------	-----------------	---------------

FIN and DESCRIPTION refer to the Finance Dimension as described in the Finance chapter of this manual. The finance dimension is the key dimension of this grid. Finance codes are listed in ascending numerical order.

Please note that the restricted grid requirements do not change the UFARS code layout. Restricted expenditure codes must follow the usual UFARS coding sequence as follows:

<b>FUND</b>	<b>ORG</b>	<b>PRO</b>	<b>FIN</b>	<b>OBJ</b>	<b>CRS</b>
XX	XXX	XXX	XXX	XXX	XXX

Once a requirement for a finance dimension is determined and the finance number has been located in the Restricted Finance Grid, the remaining possible expenditure code dimensions can be determined.

Further questions on the use of the Restricted Finance Grid can be addressed to a Regional Accounting Coordinator (RAC) or the Department of Education (Financial Management Team). Both of these resources are listed in the appendix.

The use of this Restricted Finance Grid does not supersede state and federal grant regulations. Individual grants may be more restrictive. Be sure to refer to the grant applications for greater detail.

**Permitted Code Combinations for Finance Code 302 - Operating Capital (Minn. Stat. § 126C.10, Subd. 14)**

No.	ACTIVITY	ORGANIZATION	PROGRAM	OBJECT
